PROCESSED NURSERY STOCK -

2 Year old field grown rosebushes

—Direct from the Growers

For Sales Yards, Seed Stores and Florist Shops: High quality nursery stock packaged for eye appeal, ease of handling and keepability. Full color pictured tags and planting instructions on every bush.

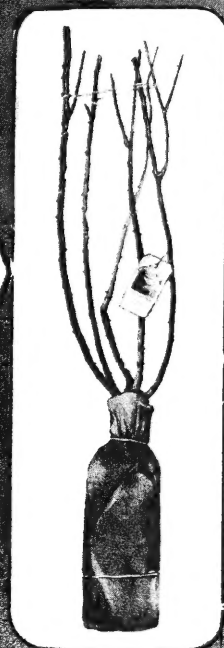

The roots of the Rose Bushes are encased in sphagnum moss, which is the best moisture-retaining material that can be used. Then the

entire root system and moss is wrapped in waterproof paper. The tops of the Rose Bushes are waxed with a non-injurious special wax; assuring you of live bushes and your customers Roses in abundance.

SPECIAL SERVICES

WE ALSO DO CUSTOM PACKAGING AND PROCESSING--If you use multiple bush packs, or combination packs, tell us what you want and we will be glad to submit samples and prices.

SUPPLIES--The Nursery Equipment we advertise is manufactured here in Winnsboro, Texas. We are Nursery Stock growers and not manufacturers. We furnished the specifications and see that our fellow nurserymen get the best implements available. This equipment is made from high carbon steel and this best steel is not always available, so in placing your order, please take into consideration the manufacturers standpoint. Orders should be placed well in advance of the date implements are needed.

DROP SHIPMENTS ON NURSERY STOCK--If you want us to - we will make shipments direct to your customers. This saves you handling cost.

MECHANIZE NOW FOR GREATER PROFITS!

AND HERE'S HOW...

These implements are a "must" for every Nurseryman, large or small. Growers everywhere are using more and more improved equipment. New ideas and better business practices are an unbeatable formula. With the continued high labor and other production costs coupled with falling nursery stock prices — it is no wonder that many Nurserymen are using our implements, to cut production costs and at the same time produce better quality stock.

Let Russell Wilson labor-saving equipment cut your production costs! They enable you to grow and sell more high class stock at lower cost per plant. This means greater profit for every nurseryman and florist who grows fruit trees, shade trees, shrubs, bulbs, evergreens, rose bushes.

IMPROVED TREE DIGGER

ITEM No. 302
\$65.00

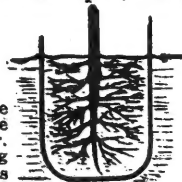

The model illustrated above is for all one row tractors not using power lifts. Also horse drawn. Other models for power lift tractors. All at same price.

Here is a practical digger for all types of trees and shrubs. Many growers use it also for root pruning. Bulb growers find it highly successful for digging bulbs.

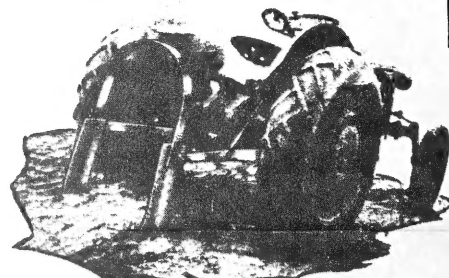

The tree digger is solid steel throughout. The blade is machined and shaped for greatest ease of operation.

It can be adjusted to run shallow for digging shallow roots and vines; it can be set quickly and simply to go down and get those deep (tap) rooting trees and shrubs.

The tree digger is manufactured in models to be pulled by either horse or tractor. The digger is made for tractors either with or without power lift. If you are using a tractor, be sure to give us make and model so you will get the digger with the right dimensions, etc., for quick, easy installation hookup. (The digger is not made for 2-row tractors.)

This drawing shows the simple principle of the sensational tree digger. The U-shaped cutting blade, 22 in. across, glides under the roots. Welded to its rear edge is a tilted "apron" which lifts and loosens the soil so the plants can be lifted out easily. (See illustration at Right.)

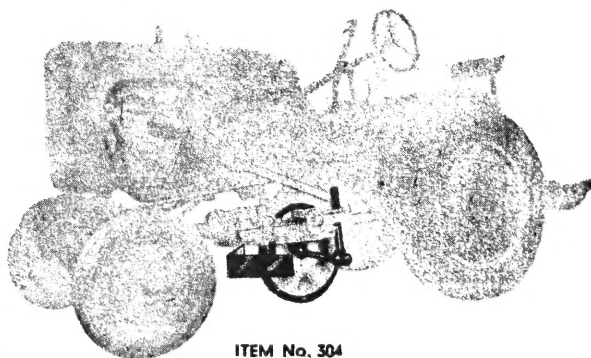

THE DIGGER AT WORK — The above photograph shows a power lift model in action. Note how deeply it cuts without effort!

PLANTER

A REVOLUTIONARY MACHINE THAT CUTS PLANTING TIME IN HALF

This startling new equipment not only cuts costs of planting — it insures uniformity. You get straight rows of even depth (adjusted to suit your needs) so that plants are left in good shape and easy to cultivate. The planting equipment is solid steel. It is actually two implements in one. A V-shaped forward piece levels the bed row to a smooth, flat surface.

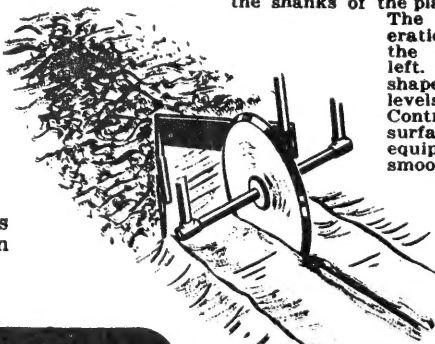

A sharp 20-inch disc roller slits a straight, narrow trench for your nursery stock. Both forward piece and cutting disc are adjustable to any height. Thus your planting trench may be cut to any desired depth. The equipment may be either horse or tractor drawn. Two sets may be installed on one 2-row tractor.

ITEM No. 304
\$35.00

The photograph above shows how the planter is attached to your tractor cultivator. All you need to do is remove the cultivator feet and insert the shanks of the planting equipment.

The principle of operation is shown in the drawing at the left. Note the V-shaped piece which levels the row bed. Contrast the rough surface ahead of the equipment with the smooth flat surface after the V has passed over it. The 20-inch sharp steel disc cuts a straight, even slot for planting. It may be adjusted to any depth desired.

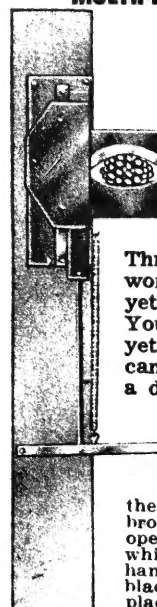

MULTIPLY OUTPUT PER MAN

3fold!

with the HARDWOOD CUTTING MACHINE

Three men can do twice the work of five with this simple yet highly efficient machine. You can eliminate two men, yet double production—three can turn out 150,000 cuttings a day!

The instrument is solid steel throughout. It is equipped with two cutting blades. The wood is placed between them, and the top blade is brought down by pressure of the operator's foot on the pedal, while both hands are free to handle the cuttings. The top blade is drawn back to starting place by a spring.
